Foreword

At Agape Innovations Limited, we are proud to celebrate a milestone month marked by impactful partnerships and forward-thinking projects that are shaping the future of sustainable agriculture in Uganda and beyond. Our involvement in this event underscores our commitment to fostering innovative solutions that benefit both communities and the environment.

A cornerstone of this commitment was the unveiling of our Black Soldier Fly (BSF) facility, a state-of-the-art center dedicated to transforming organic waste into valuable resources. This facility not only addresses the growing challenges of urban waste management, but also serves as a hub for training and empowering local communities, demonstrating how environmental solutions can create economic opportunities.

In addition, we are excited to announce the launch of the KIJANI SPACE PROJECT, a groundbreaking initiative designed to advance climate-smart agriculture across Africa. By integrating modern, sustainable practices, our aim is to enhance food security, strengthen local economies, and promote ecological balance within the region.

.With these projects, we continue to contribute to meaningful, scalable solutions that address today's challenges and pave the way for lasting change.

Sincerely,

Kamugisha Devis

General Manager, Agape Innovations Limited

TABLE OF CONTENTS

Foreword- Communication from the general manager
Agape Innovations Limited

Agro-ecological week of Action- Agape Innovations joins
PELUM Uganda to celebrate the 2024 AMASE week.

Welcoming the NEYCHAR cohort 2: Agape Innovations
ushers selected entrepreneurs to the neychar cohort 2, a
program run by SHONA

AGAPE BSF unit open to the public- Agape Innovations
opens her unit of Black soldier fly to the public for training
on converting waste to value using insects

Agape Innovations and Evergrow Organics- Agape
Innovations concludes her business consultancy program
with Evergrow organics

Agape Innovations and African Youth in Agribusiness -
Agape Innovations is invited to attend the African youth in
Agribusiness forum

Agape Innovations and the Kijani Space project - The
kijaniSpace project begins

Conclusion - Coming plans and acknowledgements.

AGRO-ECOLOGICAL WEEK OF ACTION

This month, Agape Innovations proudly collaborated with PELUM Uganda in celebrating the National Agroecology Week, a cornerstone event dedicated to promoting resilient and sustainable agricultural practices across Uganda. The event aligned with this year's Agroecology Week of Action, focusing on the critical role of agroecological practices in transforming food systems, enhancing biodiversity, and supporting sustainable development.

During the week, Agape Innovations joined hands with like-minded organizations and stakeholders to advocate for practices that strengthen local food systems and support smallholder farmers.. Through interactive sessions, we engaged with farmers and policy advocates, discussing how these practices contribute to healthier soils, more nutritious food, and a greener environment, directly supporting Uganda's goals for food security and economic resilience.

Agape Innovations' participation in the Agroecology Week also underscored its alignment with the Sustainable Development Goals (SDGs), particularly in advancing zero hunger, climate action, and responsible land management. By working alongside PELUM Uganda, we reaffirmed our commitment to ecological balance, community involvement, and the promotion of agroecological practices that empower farmers, protect biodiversity, and build a food-secure future for Uganda. .

WELCOMING THE NEYCHAR COHOT 2:

This October, our team at Agape Innovations had the privilege of connecting with Cohort 2, comprising dynamic entrepreneurs dedicated to making a difference in agriculture. The event fostered a rich exchange of ideas and insights, offering Cohort 2 valuable guidance based on our experiences as part of the program's inaugural group. Agape Innovations shared lessons learned, insights on overcoming challenges, and strategies for maximizing the resources available through Neychar.

Our involvement with the Neychar Accelerator has provided essential support, from capacity building to financial guidance, enabling us to expand our reach in Uganda and beyond. Biovision International's commitment to sustainable agriculture aligns perfectly with Agape Innovations' mission of creating environmentally friendly, locally adaptive agricultural solutions. We look forward to seeing how the new cohort will shape the future of agro-entrepreneurship in Africa, promoting resilient food systems and sustainable livelihoods.

We're excited to connect with NEYCHAR Cohort 2 in their journey and anticipate great outcomes from their projects! We believe this experience will contribute significantly to our future growth and impact

AGAPE BSF UNIT NOW OPEN TO THE PUBLIC.

Agape Innovations is excited to announce the opening of its Black Soldier Fly (BSF) unit to the public, offering hands-on training on converting organic waste into valuable resources through insect farming. This new initiative invites farmers, environmentalists, and anyone interested in sustainable agriculture to learn how Black Soldier Fly larvae can transform waste management practices and create high-quality organic fertilizer and protein-rich feed.

. BSF farming has proven to be an efficient, eco-friendly solution for managing waste while producing valuable outputs for agriculture. The training provides participants with in-depth guidance on setup, maintenance, and harvesting, giving them the knowledge and skills to launch their own BSF-based waste recycling systems.

By opening the BSF unit to the public, Agape Innovations reinforces its commitment to promoting innovative, sustainable solutions that address urban waste challenges while providing economic opportunities. This initiative not only helps reduce waste but also supports local farmers with access to affordable organic inputs.

For further details on the schedule and how to participate, please contact Agape Innovations directly. Let's work together to create a cleaner, greener future!

AGAPE INNOVATIONS CONCLUDES CONSULTANCY WITH EVERGROW

Agape Innovations is pleased to announce the successful conclusion of its business consultancy program with Evergrow Organics. Fully supported by SHONA, this collaboration aimed to support Evergrow Organics in building a robust market and sales strategy tailored to the agricultural landscape in Uganda's Central region.

Over the past several weeks, Agape Innovations provided insights and strategic guidance on key areas such as market segmentation, customer targeting, and channel selection to drive Evergrow's growth and enhance their reach.

The consultancy program was structured to strengthen Evergrow's business fundamentals. Together, we crafted a customer segmentation document, developed a comprehensive SWOT analysis, and identified the best sales channels for Evergrow's organic products. Through this partnership, Agape Innovations helped Evergrow refine its approach to market entry, define clear sales targets, and align resources for optimal performance.

We're excited to see Evergrow Organics take the next steps in its journey, and we look forward to seeing the positive impact they will have on sustainable agriculture. Agape Innovations remains dedicated to fostering collaborations that contribute to a more resilient and innovative agricultural sector in Uganda.

AGAPE INNOVATIONS AND AFRICAN YOUTH FORUM

Agape Innovations is honored to announce our recent invitation to the African Youth in Agribusiness Forum (AYAF), an influential event organized by the African Development Bank as part of its Enable Youth Program. This forum is a premier platform dedicated to empowering young African agripreneurs by providing them with resources, mentorship, and opportunities to showcase their businesses.

This year's theme, "Climate Smart Agriculture: Business and Employment Opportunities for Africa's Youth," highlights the importance of innovative solutions in agribusiness that address climate change while promoting economic growth across the continent.

Agape Innovations is thrilled to connect with like-minded youth and thought leaders dedicated to transforming agriculture in Africa. Our participation underscores our commitment to innovative, climate-resilient agriculture solutions, particularly as we work to convert waste into valuable resources through initiatives like our Black Soldier Fly program.

Attending this forum is an invaluable opportunity for Agape Innovations to continue growing its impact and contributing to Africa's agricultural future. We thank the African Development Bank and all AYAF organizers for this opportunity and are excited to further our role in Africa's youth-led agricultural transformation.

AGAPE INNOVATIONS AND THE KIJANISPACE PROJECT

Agape Innovations is excited to announce the launch of the KijaniSpace project, a groundbreaking initiative designed to enhance climate-smart agriculture across Africa. This project, spearheaded by a consortium of African and European organizations, aims to utilize advanced Earth observation data from the European Union's Copernicus program, blending it with local Internet of Things (IoT) data to support sustainable farming practices in Africa.

The pilot phase of KijaniSpace is focused on the Lake Victoria Basin, impacting crop and fish farming. The project provides an ecosystem where African farmers and agribusinesses gain access to timely and accurate environmental data, empowering them to make informed decisions and boosting resilience against climate-related challenges. Additionally, KijaniSpace promotes skill development and technology transfer, preparing Africa's next generation of agritech innovators to harness digital tools for a more sustainable future.

This collaboration not only supports African agriculture but also aligns with the African Union's Agenda 2063 and global Sustainable Development Goals, reinforcing the importance of technological and climate-resilient approaches for the continent's economic and environmental health.

WHAT IS COMING?

Agape Innovations Limited is looking forward to a fruitful November full of new activities, innovations and international partnerships. We are looking forward to continue our on going programs like the online talks about food security in partnership with Home industries in Malawi, patnerships with Wandousa Cameroon organic farmers association in Cameroon , Griincom innovate in Kenya, Shared Action Africa in Uganda among others. All these collaborations are made possible by the support from Roddenberry foundation under the +1 food security fund.

Special appreciation go to Shona group and PELUM Uganda for the support rendered to us in October Roddenberry foundation and the +1 food security community for connecting us to the world and equipping us with collaboration skills.

Lastly, we are proud of our partners, loyal customers and the amazing team at Agape Innovations Limited. We promise to keep innovating, that is what we do best.
